

SwagLabs is an online shop where you can buy your favorite outfits or accessories.

Client Requirements:

1. As a customer I want to see all the available products on a page

Each product is displayed separately in the page with a title, image, short description on max. 2 lines (if too long continued with ...), the price and an ADD TO CART button.

The list can be sorted by Price or by Name.

Clicking on a product title/price/image will open the product page.

When ADD TO CART button is pressed it switches to REMOVE button.

2. As a customer I want to be able to check a products information

Product details are displayed in this page: image, title, full description, price. color, and ADD TO CART button and a Back button.

Pressing the ADD TO CART button will add the selected product in the cart

Back button will redirect you to the last accessed page.

3. As a customer I want to see all the products I want to buy in my Shopping Cart

When products are added in the cart, they will appear in this page with a Quantity field. The Quantity field can be changed up to max. 10 pieces of a product.

A remove button is available in the Shopping cart for each product, which will delete the product from the Shopping Cart.

“Continue Shopping” button is available in this page which will open the Product list page. “CHECKOUT” button is available here, which will start the checkout process of the order.

4. As a customer I want to see my order details in the Checkout page

On the Checkout page all selected products are displayed, with a total items price, a tax price 20% and a total (item total price + tax price.)

Clicking the FINISH button will create the order.

Clicking the CANCEL button will redirect the user to the Products list page.

5. As a customer I want to see all my orders in one page

In the menu, a page named Orders needs to be available. Here, the customer will see all the orders that he/she has placed with the following details: order ID, status of the order, status of the payment, total price, the products ordered.

6. As a visitor of the shop I have to be able to see social media info and terms of services

The footer will need to have a height of maximum 300px

In the footer of the shop there must be 3 social media icons that will redirect the user to that platform: Facebook, Instagram and LinkedIn.

“Terms of Service” link needs to be available in the footer, that will redirect the user to the page describing it.

“Privacy Policy” link needs to be available in the footer, that will redirect the user to the page describing it.
